**Demand Solutions Recognized as a Top 100  
Technology Provider by *Food Logistics Magazine***

*Demand Solutions proven results at food and beverage manufacturers and distributors leads to inclusion in the FL100*

ST. LOUIS (December 21, 2009) – Demand Management, Inc., a global resource for managing the supply chain for small and mid-sized enterprises, announced today that *Food Logistics* magazine has selected Demand Solutions for inclusion in its annual Food Logistics 100 Award (FL100).

Strong expertise and proven success in the food and beverage industry has led to Demand Solutions being recognized again in the sixth-annual FL100 listing. *Food Logistics* is the only publication exclusively dedicated to the grocery and foodservice distribution supply chain. Each year the editorial staff of *Food Logistics* select the top 100 technology and solution providers that help grocery and foodservice distributors and manufacturers reach their business goals.

“The FL100 listing provides a guide for decision-making grocery and foodservice distribution and manufacturing executives,” said Katherine Doherty, editor-in-chief of *Food Logistics* magazine. “These companies rely on technology to better manage their supply chains and help weather the financial storm. The FL100 recipients have demonstrated that they can meet our readers’ specific needs.”

Demand Solutions helps food and beverage companies solve supply chain planning problems such as managing obsolescence, controlling shipping costs with load planning, forecasting demand for new products and highly seasonal products, and aligning timely business decisions with inventory control. Demand Solutions supply chain management software empowers food and beverage companies to reduce expenses and increase profits through accurate demand planning, inventory replenishment and sales & operations planning.

“Accurate demand planning is a necessity for companies in high volume, low margin industries such as food and beverage,” said Demand Management president Bill Harrison. “We are proud to be recognized for the second time by *Food Logistics* magazine for empowering our customers through the use of Demand Solutions software to reduce expenses and increase profits with accurate demand forecasting and inventory planning.”

#### **About Demand Management, Inc.**

Demand Management, Inc. (DMI) is a global resource for software, support, services and training for maximizing profits in manufacturing, distribution and retail operations. More global supply chains depend on DMI’s Demand Solutions than any other system for forecasting, demand planning and point-of-sale analysis. For more information on DMI, visit [www.demandsolutions.com](http://www.demandsolutions.com). Demand Management is a wholly-owned subsidiary of Logility which is a wholly-owned subsidiary of American Software (NASDAQ: AMSWA).

#### **Forward-Looking Statements**

This press release contains forward-looking statements that are subject to substantial risks and uncertainties. There are a number of factors that could cause actual results to differ materially from those anticipated by statements made herein. These factors include, but are not limited to, changes in general economic conditions; technology and the market for the Company’s products and services including economic conditions within the e-commerce markets; the timely availability and market acceptance of these products and services; the effect of competitive products and pricing; the uncertainty of the viability and effectiveness of strategic alliances; and the irregular pattern of the Company’s revenues. For further information about risks the Company could experience as well as other information, please refer to the Company’s Form 10-K for the year ended April 30, 2009 and other reports and documents subsequently filed with the Securities and Exchange Commission. For more information about risks the Company could face as well as other information, contact Vincent C. Klinges, Chief Financial Officer, Logility, Inc., 470 East Paces Ferry Rd., Atlanta, GA 30305,
